

Changeable Mostviertel. Fit into climate future.

PROJECT-INFORMATION, 10TH APRIL 2013, BOLZANO

Focus:

Activating and transferring climate-change adaptation knowledge to the local level. Facilitate the implementation of adaptation knowledge in day-to-day business and integration in on going community work and projects. Preparation of information adjusted to the needs of local target groups and key actors. Dissemination of information to climate change adaptation in general.

Our work plan:

01/2012–06/2012 | preparation work

- investigations about previous Alpine Space projects and other relevant informations (NAS)
- investigations about structures and networks in the pilot region
- investigations about selected municipalities of the Mostviertel
- selection of 7 municipalities to be contacted
- development of a project and communication strategy

07/2012–11/2012 | getting in contact

- establishing contacts with mayors (acquisition)
- 1st meetings with mayors (project presentation and inviting for participation)
- project presentation to organisations working at regional level (multipliers)
- initiation of (future) meetings for exchange with stakeholders
- development of a project information folder and launching website
- participation at „FAMOUS“ and „Klimaargumentarium Mostviertel Tourismus“ workshops

14.11.2012 | kick-off meeting Scheibbs

- initial meeting of all project municipalities, multipliers and stakeholders
- information transfer by climate change experts and affected people
- invited speakers: Christiane Dünwald, DI Peter Obricht, Mag. Peter Molnar, Dr. Florian Heller, Dr. Herbert Formayer, Nina Oezelt, MA
- facilitation by Dr. Karlheinz Valtl

12/2012–02/2013 | 1st workshops in municipalities

- development of workshop design together with Dr. Karlheinz Valtl
- setting targets for the workshop: 1) specification of themes, 2) core team formation
- draft for an invitation to be forwarded by the mayors
- carrying out of the workshops with taking account of the status quo and the community development up to 2050

03/2013–04/2013 | 2nd workshops in municipalities

- development of workshop design
- searching and contacting experts (theme specific for each municipality)
- starting podcast series
- setting targets for the workshop: project goal 12/2014

05/2013 | 3rd workshops in municipalities

- development of workshop design
- setting targets for the workshop:
 - project scheduling
 - task allocation core team
 - knowledge transfer (How to chair a core team? Blogging?)

06/2013–12/2013 | dissemination schedule

- development of a dissemination schedule for the public and target groups respectively
- supporting submission
 - mainly by core team
 - support supplied by Klimabündnis NÖ

07/2013–10/2013 | implementation period

- implementation as shown in the project and dissemination schedules
- expert lectures (custom-tailored)
- think tanks
- workshops
- cinema shows
- meetings of core team

10/2013 | mid-term conference

- expert key notes (e.g. Prof. Josef Eitzinger, Wolfgang Pfefferkorn)
- presentation of project status quo by municipalities
- press conference with provincial councillor
- maybe side event: FAMOUS Workshop for core team leaders
- maybe roadshow / journalist training
- facilitation by Dr. Karlheinz Valtl

10/2013–12/2014 | implementation period

- deepening the contents of our work
- reporting of activities and results
- dissemination work (TV, Radio)

10/2014 | final conference

- expert key notes (UBA, project partners, e.g. Prof. Helga Kromp-Kolb)
- presentation of project results by municipalities
- press conference with provincial councillor
- maybe roadshow / journalist training
- facilitation by Dr. Karlheinz Valtl

Our pilot municipalities:

The Ötscher mountain, located in the south of Mostviertel, is the region's highest peak, at almost 2,000 m.

Addressing the needs of the municipalities!
Addressing topics, on which actors work with passion!
Taking mainly no-regret-measures!

municipality	focus on (in context to climate change adaptation)	main target groups
Ober-Grafendorf	food sovereignty and soil conservation	farmers, citizens
Scheibbs	securing of food, water and energy	citizens
Frankenfels	energy and social structure	youth
Mank	energy-self-sufficiency and spatial planning	municipal administration, citizens
Kirchberg an der Pielach	energy-conservation-model-municipality	municipal administration, youth, citizens
Lunz am See	local supply in a broader sense (maintenance of structures, such as provision for old age, schooling, business enterprises, ...)	citizens
Gaming	appreciation of forests and their functions	citizens, educational institutions, tourism
